

# CO2 Calibration - The Quick method - Desktop Only not mobile

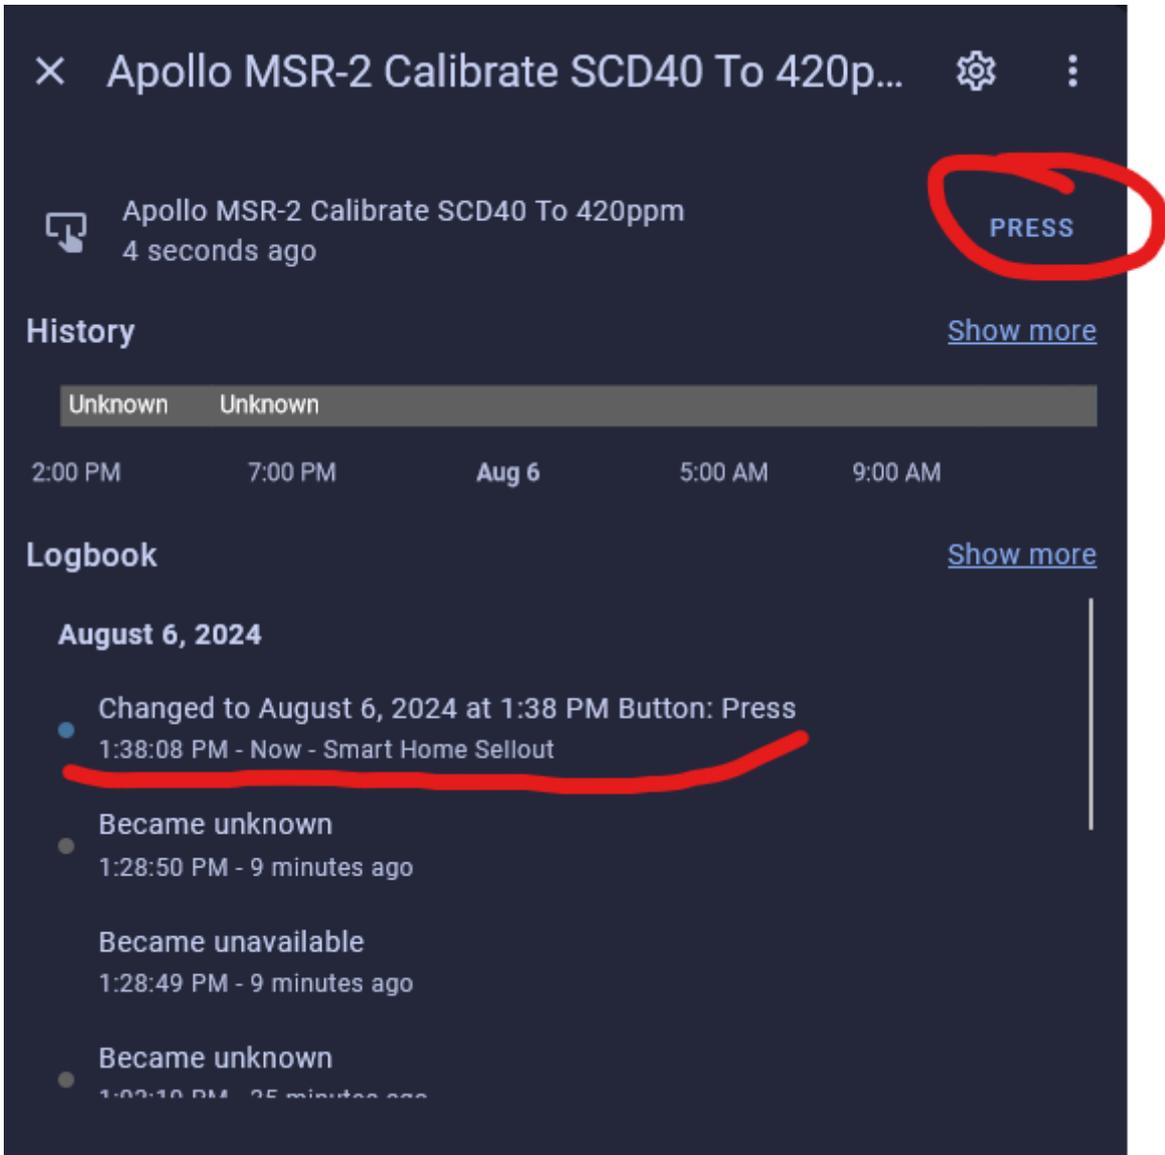

This article will guide you through a simple calibration of your CO2 sensor for any Apollo Automation device!

1. Go to your home assistant dashboard and hit the letter "e" - It will pop up with an entity filter and here we will type in "Calibrate CO2" and select the correct device.

**\*HINT\*** If you cannot get this menu to pop-up, click somewhere on the home assistant dashboard then press your "e" key **\*HINT\***

2. **DO NOT RUSH THIS** Go Plug your sensor in outside and let it sit for 5 minutes or more to get normalized readings **DO NOT RUSH THIS**
3. Click on the button that says "PRESS" and then you are done.

4. Go get your sensor from outside and plug your sensor in wherever you want it!
