

# Connecting To Hidden Wifi Network

Changing your wifi connection to fast connect can have stability problems

1. [Setup your device](#) using a regular wifi network
2. In Home Assistant go to your ESPHome add-on
3. On your sensor click on edit
4. Change the wifi section to look like the below but with your wifi credentials

[Screenshot 2023-10-30 at 10.28.50 AM.png](#)

4. Save and install to your device
