Updating Firmware

Updating Through ESPHome Addon

1. In HomeAssistant open the **[ESPHome addon](#)**
2. Or click this to **[Open your Home Assistant instance and show the dashboard of the ESPHome add-on.](#)**
3. Make sure you are running the latest version of ESPHome
4. On older hardware, it will not auto-update so you will have to uninstall and reinstall ESPHome
5. Find the sensor you want to update and click the three dots in the bottom right
