

# Exposed GPIO

[Screenshot 2023-11-18 at 6.33.00 PM.png](#)  
Image not found. Type unknown.

The back of the Apollo MSR-1 has exposed GPIO for a variety of uses.

From left to right:

- SLC (Typo, should be SCL)
  - Used for I2C
- IO 5
  - GPIO 5 of ESP32-C3-Mini
- 5V
  - Used for powering the device, or powering a external sensor
- GND
  - Ground
- 3V3
  - Used to power external sensors. Can not power the MSR-1 from this
- SDA
  - Used for I2C
